PROFESSIONAL SUMMARY

- Results-driven Computer Science undergraduate with hands-on experience in Full Stack Development, Data Engineering, Data Analytics, and Machine Learning through an industry-oriented internship at JMAN Digital Services and frontend development experience.
- Proficient in building scalable web applications, designing cloud-based data pipelines, and developing intelligent systems using React.js, Node.js, SQL, Microsoft Fabric, Databricks, Python, Power BI, and Solidity.
- Engineered end-to-end solutions including a Full Stack Event Management System, a multi-layered data pipeline for retail analytics (Bronze–Silver–Gold architecture), and a churn prediction model achieving AUC of 0.99 using XGBoost.
- Developed interactive Power BI dashboards to analyze revenue trends, delivery performance, and promotional impact, enabling data-driven decision making and business insights.
- Built an AI-powered College Admission Assistant using Retrieval-Augmented Generation (RAG) and Agentic AI, integrating LangChain, FastAPI, vector databases, and local LLMs for real-time intelligent responses.
- Strong foundation in Data Structures, Algorithms, DBMS, Operating Systems, and Computer Networks, with focus on scalable system design, performance optimization, and solving real-world problems.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python, JavaScript, SQL, Solidity
- **Frontend:** HTML5, CSS3, React.js, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs
- **Data Engineering & Analytics:** SQL, Advanced SQL, Microsoft Fabric, Databricks, Power BI, ETL/ELT Pipelines
- **Machine Learning & AI:** Python, Pandas, NumPy, Scikit-learn, TensorFlow, NLP, RAG, LangChain
- **Databases:** MySQL, PostgreSQL, SQLite, ChromaDB
- **DevOps & Tools:** Git, GitHub, Docker, Terraform, CI/CD, Remix
- **Cloud & Platforms:** AWS, Azure, Web, Windows, Arduino
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Soft Skills:** Leadership, Event Management, Public Speaking, Communication

EDUCATION

- **Chandigarh University** Punjab, India
Bachelor of Engineering - Computer Science and Engineering CGPA: 8.11 July 2022 – June 2026
Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Web Technologies
Achievements: Top 2% in NPTEL Cloud Computing Exam (2024); Recipient of DLL SWAYAM Excellence Award for outstanding performance in Cloud Computing
Activities: Active member of Tech Titans Club; participated in CodeRush technical event and collaborative development activities
- **Dr. Raghubir Parkash S.D. Senior Secondary School** Barnala, Punjab, India
Higher Secondary Certificate (Class XII) - PCM + Computer Science 88.4% April 2021 – April 2022
- **Sarchitkari Senior Secondary Vidya Mandir School** Barnala, Punjab, India
Matriculation Certificate (Class X) Grade: A+ April 2019 – March 2020

TECHNICAL EXPERIENCE

- **JMAN Digital Services Pvt. Ltd.** Chennai, India
Software Engineer Feb 2026 – Present
 - **Full Stack Development:** Developed a full-stack Event Management System using React.js and Node.js, implementing responsive UI components and backend API integration.
 - **Data Engineering:** Designed and implemented a scalable ELT data pipeline using Microsoft Fabric and Databricks, following Bronze–Silver–Gold architecture for data transformation and analytics.
 - **Data Analytics & BI:** Built interactive Power BI dashboards to analyze revenue trends, delivery performance, and promotional impact, enabling data-driven decision making.
 - **Machine Learning:** Developed a churn prediction model using Python and XGBoost, achieving AUC of 0.99 and identifying key customer behavior patterns.
 - **AI Systems:** Built an AI-powered College Admission Assistant using Retrieval-Augmented Generation (RAG) and Agentic AI with LangChain, FastAPI, and vector databases for intelligent query handling.

- **Natural Coders** Remote
Frontend Developer Intern *Dec 2024 – Feb 2025*
 - **E-Commerce Platform Development:** Developed a responsive e-commerce web application using HTML, CSS, JavaScript, and Bootstrap, improving product data-fetching speed by 40%.
 - **UI/UX Optimization:** Enhanced frontend performance and user experience, improving usability by 25%.
 - **Agile Development:** Collaborated in an Agile environment, delivering frontend features within a 45-day timeline.
- **METACRAFTERS** Remote
Blockchain Developer Trainee *Jun 2024 – Jul 2024*
 - **Smart Contract Development:** Designed and deployed 3+ decentralized applications using Solidity, improving transaction security.
 - **Web3 Implementation:** Worked with MetaMask, Remix, and Web3 tools to build and test blockchain applications.

PROJECTS

- **Event Management System - Full Stack & Platform Engineering:**
 - **Tech Stack:** React.js, Node.js, NestJS, Docker, CI/CD, Terraform, Azure
 - Developed a full-stack event management platform with responsive UI and backend API integration.
 - Implemented Docker containerization, CI/CD pipelines, and infrastructure provisioning using Terraform.
 - Integrated cloud deployment workflows on Azure for scalable production-ready architecture.
 - Collaborated in an Agile team environment following industry-standard workflows.
 - **GitHub:** Event Management System
- **Retail Data Engineering Pipeline - ELT Architecture:**
 - **Tech Stack:** SQL, Microsoft Fabric, Databricks, PySpark
 - Designed a scalable ELT pipeline using Bronze–Silver–Gold architecture.
 - Processed multi-source retail datasets with validation, deduplication, and schema enforcement.
 - Generated KPIs such as revenue trends, customer lifetime value, and regional insights.
 - Implemented transformations using SQL and PySpark in Fabric and Databricks.
- **Power BI Retail Analytics Dashboard - Business Intelligence:**
 - **Tech Stack:** Power BI, DAX
 - Built dashboards for revenue, delivery performance, and promotional analytics.
 - Implemented filters, drill-down analysis, and KPI visualizations.
 - Enabled centralized, data-driven decision making across retail operations.
- **Pre-Renewal Churn Prediction Model - Machine Learning:**
 - **Tech Stack:** Python, Scikit-learn, XGBoost, Pandas, NumPy
 - Developed a churn prediction model achieving AUC of 0.99.
 - Performed EDA, feature engineering, and handled class imbalance using SMOTE.
 - Evaluated multiple models and selected XGBoost as the best performer.
 - Identified key churn drivers for actionable business insights.
 - **GitHub:** Churn Prediction Project
- **AI-Powered College Admission Assistant - RAG & Agentic AI:**
 - **Tech Stack:** Python, LangChain, FastAPI, ChromaDB, Ollama
 - Built an AI assistant using RAG and Agentic AI for admission guidance.
 - Implemented vector search with embeddings and API-based responses.
 - Developed backend using FastAPI and integrated with frontend UI.
 - Optimized performance using local LLM inference via Ollama.
 - **GitHub:** College Admission Assistant
- **OHI-MART - E-Commerce Platform:**
 - **Tech Stack:** HTML, CSS, JavaScript, Bootstrap
 - Developed a responsive e-commerce platform with authentication and search features.
 - Integrated FakeStore API for dynamic product rendering.
 - Improved page load performance by 35%.
 - **GitHub:** Live Project
- **Blockchain-Based Decentralized Applications - Web3:**

- **Tech Stack:** Solidity, Web3.js, Hardhat, MetaMask, Remix
- Developed 4+ decentralized applications using Solidity.
- Implemented wallet integration and secure transaction handling.
- Managed deployment workflows using Hardhat and Remix.
- **GitHub:** Blockchain Repositories
- **Secure Authentication System - Python & SQL:**
 - **Tech Stack:** Python, SQL
 - Built secure authentication with hashed passwords, reducing vulnerabilities by 40%.
 - Optimized database queries, improving retrieval speed by 25%.
- **Bank Management System - Java:**
 - **Tech Stack:** Java, SQL
 - Developed banking system for deposits, withdrawals, and balance tracking.
 - Improved transaction efficiency using OOP principles.
- **Text Editor - Python:**
 - **Tech Stack:** Python, Tkinter
 - Built a text editor with formatting and file handling features.
 - Reduced file processing time by 15%.
- **Text Summarization - NLP:**
 - **Tech Stack:** Python, NLTK
 - Developed NLP-based summarization system for large documents.
 - Improved readability while preserving key insights.

HONORS & AWARDS

- Top 2% in All India NPTEL Cloud Computing Examination (2024)
- Recipient of DLL SWAYAM Excellence Award for outstanding performance in Cloud Computing, awarded at the DLL-MOOCs Achievement Awards 2024, Chandigarh University
- Organizer Team Member for SAP Hackathon, contributing to event coordination, participant management, and execution
- Active member of Tech Titans Club; participated in CodeRush technical event and collaborative activities
- Served in National Cadet Corps (NCC - Navy Wing), developing leadership, discipline, and teamwork skills

CERTIFICATIONS

- **NPTEL Cloud Computing** – Top 2% Rank (2024)
- **Databases and SQL for Data Science with Python** – Coursera
- **Introduction to Relational Databases (RDBMS)** – Meta, Coursera
- **Internet of Things (IoT)** – NPTEL
- **Introduction to Database** – Meta, Coursera

ADDITIONAL INFORMATION

- **Languages:** English (Professional Proficiency), Hindi (Native), Punjabi (Native)
- **Availability:** Immediate Joiner; actively seeking full-time roles in Software Development, Full Stack Development, and Data/AI domains
- **Work Preference:** Open to On-site, Hybrid, and Remote opportunities; willing to relocate
- **Interests:** Data Structures & Algorithms, Full Stack Development, Machine Learning & AI, System Design, Building Scalable Applications
